## USER GUIDE 2.4 ADOBE PREMIERE PRO CC

# LOUPEDECK+ AND PREMIERE PRO

The Loupedeck+™ console for Adobe Lightroom Classic CC™, Aurora HDR, and Adobe Premiere Pro CC. Adobe Premiere Pro is the latest software to be integrated with Loupedeck, with many more integrations to follow.

Within this manual you will learn how to setup your Loupedeck+ with Premiere Pro. This guide will cover the basic functions and expectations when using your Loupedeck+ with Premiere.

To enhance your editing workflow, please read this user guide and learn the basics, so you can experience everything the Loupedeck+ has to offer.

Loupedeck+ works seamlessly with Mac and Windows operating systems running these versions:

- Adobe® Premiere Pro 12 or later
- Adobe® Lightroom® 7.4 or later
- Adobe® Lightroom® 2015.1 to 2015.14  
(Stand alone versions 6.0 to 6.14)
- Windows® 10, Windows® 8.1, Windows® 7
- Mac® OS 10.12 and 10.13

## CONNECTING AND SETTING UP LOUPEDECK+

We know that you might be eager to get started editing with your Loupedeck, however you must first download the Loupedeck software. Internet connection is required to download the software

How to Set up your Loupedeck+:

1. Download & install the latest Loupedeck software v 2.4 by visiting [www.loupedeck.com/setup](http://www.loupedeck.com/setup)
2. Connect the USB cable to the USB port of your computer.
3. Go to Adobe Premiere Preferences and select the "Add" button
4. Choose Loupedeck+ from dropdown menu, add then press OK
5. Close reference setting by clicking OK

Setting up Adobe Premiere Pro CC with Loupedeck+

Please follow the instructions below to begin working with Adobe Premiere Pro:

Windows:

1. Open Adobe Premiere Pro CC
2. Go to Edit -> Preferences -> Control surface -> Push "Add"
3. Select "Loupedeck 2" and accept
4. Restart/Start the Loupedeck Software

MacOS:

1. Open Adobe Premiere Pro CC
2. Go to Premiere Pro CC -> Edit -> Preferences -> Control surface -> Push "Add"
3. Select "Loupedeck 2" and accept
4. Restart/Start the Loupedeck Software

# WORKING WITH LOUPEDECK+

In Premiere Pro, Loupedeck is fully customizable to match your personal editing workflow. We have selected some factory default functions, so you begin editing immediately.

We have also added printable cheat-sheets to help guide you through your first steps of using Loupedeck+. For your own settings, please print blank Loupedeck+ layout sheets, located on the last page!

Loupedeck+ has basic commands such as, exposure and contrast on the default layer. Pressing FN and using the same dials and buttons will create a second layer, called the FN layer.

Loupedeck+ also has a “Custom Mode” which can be activated by pressing the “Custom Mode” button (LED will be lit when Custom Mode is activated). This will open all the dials for extra customization as a third layer. When “Custom Mode” is enabled by pressing FN, you will have an alternative “Custom Mode” with FN, which makes four different layers of open possibilities to master Premiere Pro! When using “Custom Mode”, all the other functions on buttons D1 and D2 dials are the same as in the default layer. When “Custom Mode” with FN is activated, all the other functions on buttons D1 and D2 dials are the same as in the normal FN layer.

By starting to use Loupedeck+ in steps you will experience a fast and simple learning curve!

## HOW TO CUSTOMIZE YOUR SETTINGS?

After you have installed Loupedeck+ your application will appear as below:

Within the upper right corner, you will find the Device and Application dropdown menus. From the Application menu select “Premiere Pro.”

On the configuration UI: Click the button with your mouse you wish to configure. Some buttons and dials are grouped together. If you click on the “Control Dial” the following dialog will open:

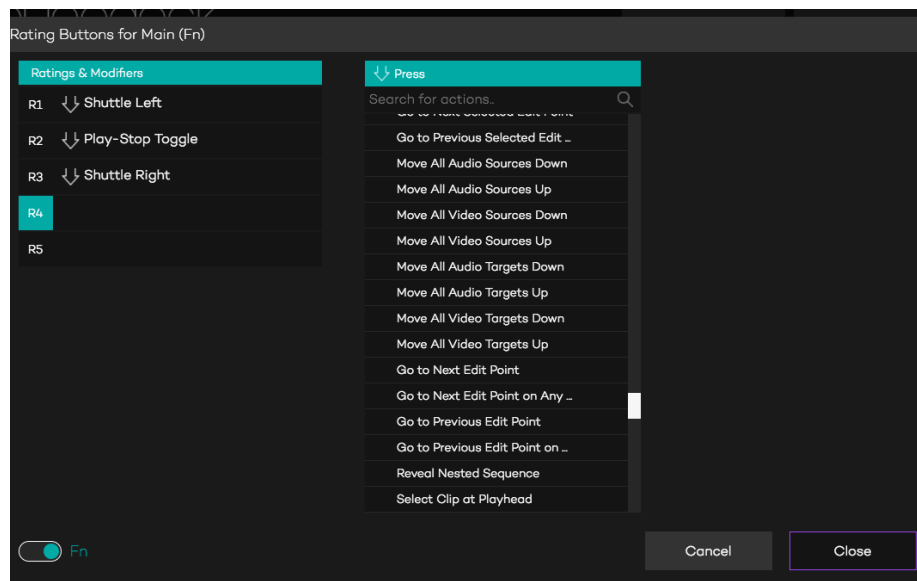

Within the left column, you will find the current function for buttons and dials. In the middle column you can select different Premiere Pro functions. Currently, Command is marked with an arrow under the function (rotate or press).

“Search for Action”, is recommended due to the large amount of Premiere Pro functions listed inside Loupedeck configuration software. Commands are sorted to folders by their appearance in Premier Pro. For example, all commands that aid in timeline navigation will be under \*Timeline Navigation”.

Please note, in some cases the naming of the function within the Loupedeck+ configuration software differs from the naming presented in Premiere Pro.

You will find the second level by clicking FN-switch from bottom-left corner. All of these commands are available in Loupedeck+ when you have FN button pressed down.

All changes are automatically saved, no additional actions are necessary to apply changes. When “Cancel” is pressed all changes will be discarded.

# QUESTIONS?

Encountered something unexpected?  
Here are a few helpful hints.

## **I connected Loupedeck+ to my computer and opened Premiere Pro, but nothing happens?**

You have to select Loupedeck as your control surface. Go to:  
EDIT -> Preferences -> Control Surface  
From Device class, select: Loupedeck

## **Also, what is your operating system?**

Loupedeck for Premiere Pro using configuration software 2.4 (or newer) is compatible with Windows® 10 or later, Windows® 8.1, Windows® 7, and Mac® OS 10.12 or later.

You can find FAQs and support at [www.loupedeck.com/support](http://www.loupedeck.com/support)

The diagram illustrates a custom layout for the Loupedeck, featuring a variety of controls arranged in a structured grid:

- Top Left:** A 2x2 grid of buttons, with the top-left button labeled "Custom Mode".
- Top Center:** A "Clr / BW" button, followed by a vertical stack of three buttons labeled "Hue", "Sat", and "Lum".
- Top Right:** A row of three buttons.
- Center Left:** The "LOUPEDECK +" logo and a large "Control Dial".
- Center:** A row of eight vertical sliders, each with a small circular indicator above it. Below the fourth and fifth sliders are two small circular buttons.
- Center Right:** Two circular controls labeled "Temperature" and "Tint".
- Bottom Left:** A 2x5 grid of buttons, with a small circular button positioned between the two rows.
- Bottom Center:** A row of four circular controls labeled "Contrast", "Clarity", "Shadows", and "Highlights". Below these are four more circular controls labeled "Exposure", "Blacks", "Whites", and "D2".
- Bottom Right:** Two circular controls labeled "Vibrance" and "Saturation", followed by a 2x3 grid of buttons.
