# WELCOME TO DATA NATIVES 2018

Data Natives is the meeting point for industry experts, entrepreneurs, tech and business professionals to inspire one another and disrupt the status quo. Now in its fourth year, Data Natives has become established as Europe's premier conference for the data-driven generation, attracting some of the industry's most high-profile speakers.

Across two days of talks, panels and workshops, Data Natives explores the cutting edge of tech innovation: from Big Data to Blockchain, from AI to the Internet of Things.

The theme of Data Natives 2018 is "The Quickening". Technology is developing at an unprecedented rate- the most powerful supercomputer in the world, IBM's Summit, is capable of processing 200 quadrillion calculations per second.

But what does this accelerated pace mean for businesses, for scientists, and for each and every human? How can we best use the influx of data to fuel the breakthroughs that will shape our scientific landscape?
