

Search, find and book the perfect trip. Fast, cheap or eco-friendly: Travel Your Way.

Travel can be wonderful. But planning and booking take time and effort, especially if the trip involves more than a single train, plane or bus.

fromAtoB is a travel search and booking platform that makes this daunting process faster, easier and more transparent. By using intermodal technology (the intelligent combination of different means of transport) we provide more relevant journeys for travellers to choose from. In fact, 55% of routes that travellers search for on our platform are only possible by making intermodal choices.

It began in 2008 as an idea in the heads of three university classmates from Aachen. Trips home involved countless travel websites, comparing buses, trains and other means of transport in a spreadsheet. So the three students set out to build something better.

With support along the way from the EU commission and the German government, fromAtoB helps travellers to find the perfect trip. A one-stop platform to search, compare and book across Germany, Austria and Switzerland, with...

Travel Your Way

Combine modes of transport.

Even if a trip means taking a flight, then a train, then a bus, you can find and book it all in one place.

Choose based on your needs.

Whether you want to travel fast, cheap or eco-friendly, you can filter and compare to pick the best option for you.

Fast search and booking.

Search 750 providers in under 2 seconds. Less time watching a spinning wheel, more time comparing results.

The Team Behind fromAtoB

The Berlin-based team of 88 spans over 30 countries of origin, and is led by Gunnar Berning. A serial entrepreneur and startup-coach, Gunnar took over as CEO in 2015, overseeing from launch to rapid growth, including the acquisition in 2018 by transport giant Tank und Rast.

Some Gunnar facts: he was the youngest official photographer at the Atlanta 1996 Olympic Games, and financed his time at university as a professional sports photographer. He learned to program on early computers (around 1989) and loves to fly. He even started a pilot license, but never finished it because a new startup idea started to pick up...
